Sport Interests

My major field in sport is Track & Field (sprinting). I obtained the first and second prizes at university competitions in 200 meters in 2011 and 2012, respectively. However, I have involved with several sport activities such as soccer, martial arts, badminton. Furthermore, I am interested in the scientific aspects of sports. In general, I enjoy practicing and learning all types of sports and outdoor activities.

Teaching & lecturing Experience

I am a firm believer in active learning, and I try to maintain a very lively and interactive classroom. To me, teaching is not about lecturing to students; it is about presenting theories, concepts, and empirical material to students in a way that they can integrate this information into

their own life experience. I try to accomplish this not only in my presentations and lectures, but in the questions that structure classroom discussion and, particularly, in writing assignments. Below are my taught courses and interested courses based on my study background and research experience:
